

1.5.6 Add the Other Trainers

We still have two more trainers to add: Joanna Gill and Harry "the Headband" Smith. Let's look at the mock-up again, as seen in this image:

Meet The Trainers

Arron Stephens

Speed / Strength

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Sequi neque animi quo cupiditate commodi saepe culpa sed itaque velit maiores optio dolore excepturi aperiam dolores, voluptatibus suscipit amet quis repellat!

Joanna Gill

Endurance

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Sequi neque animi quo cupiditate commodi saepe culpa sed itaque velit maiores optio dolore excepturi aperiam dolores, voluptatibus suscipit amet quis repellat!

Harry "The Headband" Smith

Strength

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Sequi neque animi quo cupiditate commodi saepe culpa sed itaque velit maiores optio dolore excepturi aperiam dolores, voluptatibus suscipit amet quis repellat!

We can use our first trainer's `<article>` element as a reference to build the other trainers' `<article>` elements. We just need to make a couple of tweaks for the content because each trainer has a unique name, role, bio, and image.

You can go ahead and add the next two, but make sure to notice a subtle difference between the second and third trainer's HTML:

```
<!-- second trainer bio -->
<article class="trainer">
```

```
<div class="trainer-bio text-right">
  <h3>Joanna Gill</h3>
  <h4>Endurance</h4>
  <p>
    Lorem ipsum, dolor sit amet consectetur adipisicing elit. Sequi
    itaque velit maiores optio dolorem excepturi aperiam dolores, vo
  </p>
</div>

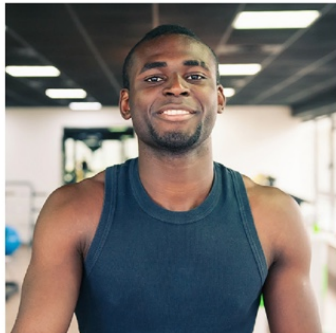

<!-- third trainer bio -->
<article class="trainer">
  
    <h3>Harry "the Headband" Smith</h3>
    <h4>Strength</h4>
    <p>
      Lorem ipsum, dolor sit amet consectetur adipisicing elit. Sequi
      itaque velit maiores optio dolorem excepturi aperiam dolores, vo
    </p>
  </div>
</article>
```

So besides the content and images changing to reflect each trainer's information, what changed here and how did it affect the layout? It has nothing to do with the CSS, but rather how we organized the HTML content.

For our second trainer, we wanted to have the image on the right and text on the left. To achieve this, we could have floated it to the right, but instead we simply switched the order of their appearance in the HTML. This way, the text comes first naturally and the image appears to the right because the HTML for it comes after it. This might not be the best solution for every situation that needs this type of layout, but this works for our current layout and definitely makes our lives a bit easier!

Save the file and reload the webpage. You should now have a finished "Meet the Trainers" section that looks like this image:

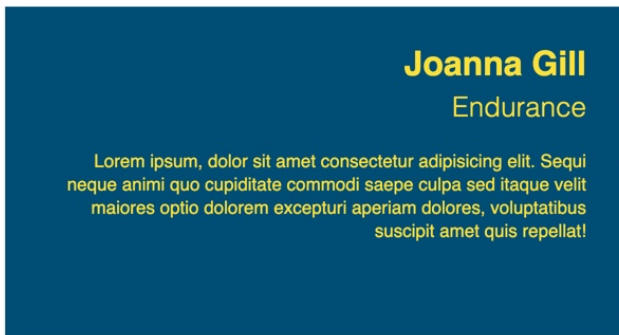

Meet The Trainers

Arron Stephens

Speed / Strength

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Sequi neque animi quo cupiditate commodi saepe culpa sed itaque velit maiores optio dolorem excepturi aperiam dolores, voluptatibus suscipit amet quis repellat!

Joanna Gill

Endurance

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Sequi neque animi quo cupiditate commodi saepe culpa sed itaque velit maiores optio dolorem excepturi aperiam dolores, voluptatibus suscipit amet quis repellat!

Harry "The Headband" Smith

Strength

Lorem ipsum, dolor sit amet consectetur adipisicing elit. Sequi neque animi quo cupiditate commodi saepe culpa sed itaque velit maiores optio dolorem excepturi aperiam dolores, voluptatibus suscipit amet quis repellat!

Way to go! Don't forget to do a `git add -A`, `git commit -m "commit message"`, and `git push origin master` to save your work and get it up to GitHub.

Next, pause for a moment to take the following knowledge check:

Final score: 100%
