

## 4.3.3 Create a New Git Branch

Take a moment to review the GitHub issue that corresponds to these features:

The expected behavior deals largely with updating tasks to varying degrees, so the name of the branch can be something similar.

Let's make that feature branch now:

1. Use the `git branch` command to verify that you're in the `develop` branch. If not, switch to `develop` before proceeding (e.g., by using the `git checkout develop` command).
2. Use the command `git checkout -b feature/creating-tasks` to create and switch to the new branch.
