# 4   Up and Running

Module Project: Taskinator

In this module, you'll work on a personal project: building a task-tracker app called Taskinator. Taskinator will allow you to organize your personal to-do list items by clicking and dragging them into categories like To Do, In Progress, and Completed. When you're done, you'll have a useful app and a solid addition to your portfolio!

Watch this video to learn more about what you'll build this week:

Getting Ready

You already have everything you need to complete this module. The lessons will give you an opportunity to sharpen your tools!
