# 2.1.1    Introduction

The Run Buddy website is a huge success so far! This means that management has the incentive and capital to upgrade the site. This week, we'll focus on building version 2.0 of Run Buddy, with the goal of making the site mobile-friendly and easier to use.

You've already learned some important HTML and Git skills that give you a solid foundation to stand on as you approach this project. Building on those, we'll dive more deeply into CSS and use some of its powerful layout capabilities including media queries, CSS Grid, and flexbox. Get ready to level up!

Before you begin this—or any—project, you need to set up Git repo and workflow. This is a fantastic opportunity to learn more about the process of software development and the tools that support it.
